# California Climate Disclosure Report

CALIFORNIA SB 253 | SCOPE 1 AND SCOPE 2 GHG EMISSIONS

## Delivering a More Sustainable Future

**KBR, Inc.**

**Consolidated report on behalf of KBR Holdings, LLC and Wyle, Inc.**

Reporting period: January 1 through December 31, 2025

## Purpose and reporting entities

KBR, Inc. (the "Parent") submits this consolidated disclosure on behalf of KBR Holdings, LLC and Wyle, Inc. (the "Covered Entities"), the only covered reporting entities identified in this disclosure for California SB 253 purposes. In this disclosure, "KBR" means the Parent and its subsidiaries collectively; references to the Covered Entities mean only KBR Holdings, LLC and Wyle, Inc. The reporting period for all entities is January 1 through December 31, 2025.

The Corporate Carbon Footprint - 2025 report provides the underlying inventory, calculation methodology and data limitations. This disclosure is intended to be read together with that report and the documents listed under "Source documents" in "Supporting reports & assurance."

## Consolidated reporting basis

Emissions are reported once at the consolidated KBR level using the operational-control boundary described under "Reporting boundary & methodology" and are not separately allocated to either Covered Entity. The consolidated figures should not be interpreted as the standalone emissions of KBR Holdings, LLC or Wyle, Inc., or added together as separate entity inventories.

## 2025 Scope 1 and Scope 2 emissions

| Inventory Measured | Metric Tonnes CO2e |
|---|---|
| Scope 1: direct emissions | 5,007 |
| Scope 2: location-based | 21,000 |
| Scope 2: market-based | 0 |

Source: KBR Sustainability and Corporate Responsibility Report 2025, "Our Environmental and Climate Transition Plan."

Scope 2 location-based and market-based results are alternative accounting presentations and are not additive. The market-based result reflects KBR's purchase of renewable energy certificates and use of green electricity, including green tariffs. The table presents gross inventory emissions before any separate offset or climate-contribution claims.

Reporting period: January 1 through December 31, 2025.
Inventory preparer: ClimatePartner LLC.
Accounting basis: GHG Protocol Corporate Accounting and Reporting Standard.

# Reporting boundary & methodology

## Organizational boundary

KBR applies an operational-control approach. Operations are included where KBR employs its operational policies and procedures within an entity or facility. The 2025 inventory identifies 158 facilities in 13 countries within KBR's operational control.

Operations managed as part of services provided to clients, where the client's operational policies and procedures apply, fall outside the assessment boundary. The inventory does not use a financial-control or equity-share approach.

The inventory also excludes residential leases; pass-through agreements where KBR is linked to a facility by lease only; joint-venture leases where KBR is not the primary occupant; and executive suites or virtual offices with limited KBR presence.

## Emissions sources

Scope 1 covers direct emissions from facility heating, refrigerant leakage, on-site combustion and company vehicles within the inventory boundary. Scope 2 covers purchased electricity for facilities and company-owned electric vehicles.

Vehicles used for internal corporate services are retained within the Scope 1 and Scope 2 boundary. Vehicles assigned for employee commuting or personal use, and vehicles assigned to specific projects, are included in Scope 3 in the underlying inventory and not included here.

## Calculation methods and limitations

ClimatePartner LLC prepared the inventory in accordance with the GHG Protocol Corporate Accounting and Reporting Standard. Calculations use a combination of activity data, assumption-based activity data and spend-based data. The underlying report describes the methods, emission factors and limitations applicable to the inventory.

This summary does not replace those methodological disclosures. Estimates and assumptions should be understood in the context of the data-quality discussion in the Corporate Carbon Footprint report.

## Scope of this disclosure

This document focuses on Scope 1 and Scope 2 emissions. The underlying Corporate Carbon Footprint report also includes Scope 3 information. Those additional disclosures remain available in the source report and are not presented as separate legal-entity inventories here.

# Supporting reports & assurance

## Independent assurance

LRQA, Inc. (“LRQA”) provided limited assurance, with 5% materiality, over KBR's calendar-year 2025 greenhouse gas emissions inventory covering parent company KBR and all of its subsidiaries. LRQA’s final independent assurance statement, dated June 24, 2026, includes Scope 1 and both location-based and market-based Scope 2 emissions, as well as Scope 3 Category 6, which is outside this California climate disclosure. The statement's criteria, scope, exclusions and limitations govern the assurance provided. This disclosure does not extend that assurance to separate subsidiary inventories or information outside the statement.
