KBR is the leading provider of human performance and readiness solutions for U.S. astronauts and U.S. Special Operations Forces. We are known for helping individuals survive and excel in extreme environments and under psychologically challenging conditions.

Under the Human Health and Performance Contract (HHPC), our scientists, technicians and medical personnel have worked with every U.S. astronaut since 1968 and we leverage that biomedical research, conditioning and medical expertise to support elite military personnel. Whether it is aboard the International Space Station (ISS) or here on Earth, KBR employees are solving the challenges of human spaceflight and pioneering breakthroughs to optimize the resilience of military personnel.

Under the terms of the Preservation of the Force and Family II (POTFF II) contract, our team is providing personnel capable of increasing the physical, mental and spiritual capacity of the warfighter.

**KBR SUBJECT MATTER EXPERTISE:**
