This Redemption Statement has been produced for

KBR, INC.

by

CLIMATEPARTNER GMBH

confirming the Redemption of

354.000000

I-REC Certificates, representing 354.000000 MWh of electricity generated from renewable sources

This Statement relates to electricity consumption located at or in

Saudi Arabia

in respect of the reporting period

2022-01-01 to 2022-12-31

The stated Redemption Purpose is

ClimatePartner submits these I-RECs on behalf of KBR, Inc. to document the origin of electricity supply in Saudi Arabia for 2022
## Redeemed Certificates

### Production Device Details

<table>
<thead>
<tr>
<th>Device</th>
<th>Country of Origin</th>
<th>Energy Source</th>
<th>Technology</th>
<th>Supported</th>
<th>Commissioning Date</th>
<th>Carbon (CO₂ / MWh)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mohammed bin Rashid Al Maktoum Solar Park Phase 3</td>
<td>United Arab Emirates</td>
<td>Solar</td>
<td>PV Ground mounted</td>
<td>No</td>
<td>2018-05-01</td>
<td>0.000000</td>
</tr>
</tbody>
</table>

### Redeemed Certificates

<table>
<thead>
<tr>
<th>From Certificate ID</th>
<th>To Certificate ID</th>
<th>Number of Certificates</th>
<th>Offset Attributes</th>
<th>Period of Production</th>
<th>Issuer</th>
</tr>
</thead>
</table>
Auditor Notes

This statement is proof of the secure and unique redemption of the I-RECs stated above for the named beneficiary to be reported against consumption in the country during the reporting year stated. I-RECs are assigned to a beneficiary at redemption and cannot be further assigned to a third party. No other use of these I-RECs is valid under the I-REC Standard.

Where offset attributes are 'inc' the device registrant, who exclusively holds the environmental attribute rights, has undertaken never to release carbon offsets in association with these MWh; 'excl' means carbon offsets relating to these MWh may be traded independently at some point in the future.

For labelling scheme information please refer to the scheme's website. Labelling scheme listing may not be exhaustive.

Thermal plant emit carbon as part of the combustion process. Whilst this is not zero carbon, it is generally recognised as carbon neutral where the source is recent biomass.
